

STENO-S 4

CONFERENCE & RECORDING SOFTWARE

STENO-S STORES YOUR MEETING DIGITAL, RELIABLY AND SAFELY

steno-s is a software for audio recording and playing meetings or conferences with a standard Windows PC. steno-s features a simple and comprehensible user interface, which allows navigating quickly and easily through your conference recording.

In business, the digital storage and easy retrieval of information is more and more important. Intuitive software considerably simplifies and accelerates the preparation and evaluation of a meeting or conference such as the creation of an agenda or protocol. The steno-s software has been developed for exactly this purpose. With just one mouse click steno-s will easily record all discussions during your meeting.

Before, during and after the recording you can mark important events (e.g. different speakers, agenda items or decisions) and in this way you can structure the course of your meeting. Simply embed used files (such as presentations, tables, pictures) into your recording and store them on a network or storage media. For processing the stored meetings on other PC's you can use the licensefree steno-s player mode.

Designed for Windows® 7 / 8

1. Create or import an agenda / speaker's list

With steno-s you can easily import your agenda from other programs with copy and paste to prepare markers before the meeting or conference.

2. Start a recording and place markers

During the discussion or meeting, the items of the agenda are dealt with, questions will be asked, various topics will be discussed and decisions will be made. These and other important items within the recording can be logged and highlighted with markers.

3. Minute-taking and / or filing

To play recorded meetings, steno-s can be installed on as many PCs as you wish. In this way several people can work with a meeting, even when the meeting is still being recorded. For taking the minute you can use the optional STA 44 foot switch and navigate through the meeting with your feet while your hands are free for typing. Save the recording on external media or save the data on your server.

At www.steno-s.com you will find a demo version for download.

Your advantages at a glance

- Sustainable, maintenance-free software solution for recording your meeting
- Multi-lingual, intuitive user interface for maximum ease of use
- Simultaneous recording of multiple channels
- Connection of several MPC 70 USB boundary microphones possible
- Listening into individual tracks for optimal speech intelligibility
- Allocation of markers with webcam snapshots
- Saving of speaker profiles with photos
- Embedding of any file (e.g. Excel or PowerPoint)
- Direct scanning of documents via TWAIN-compatible scanner
- Import and export of markers and lists of speakers
- Full text search for prepared and placed markers
- Selective access to relevant speeches
- Connects to beyerdynamic conference systems
- Integration of e-government applications
- Time compression – increase of the playback speed without shifting the tone pitch
- Read after write – playback of the meeting while recording
- Convenient control of the playback via optional USB foot switch
- Import of meetings recorded in previous steno-s versions
- Export meetings to other storage locations
- For archiving purposes burn meetings on CD / DVD
- Export audio data of meetings in WAV or WMA format
- Free steno-s player mode for the playback of recorded meetings on other PCs
- Licensing via USB dongle for easy installation of backup systems
- Without a license dongle, steno-s will start in the player mode – in this mode the stored meetings are protected against accidental changes
- Designed for Windows® 7 and 8

Versions

steno-s 4 Conference

The professional solution for recording, processing and archiving of meetings and discussions.

For use with PC audio devices and MPC 70 USB microphones. Connection to beyerdynamic conference systems and e-Government applications.

- Session-specific recording of meetings
- Recording of up to three audio tracks (1 x sound card + 2 x MPC 70 USB or 3 x MPC 70 USB)

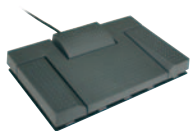

steno-s 4 Court

Enhanced functionality for complex conference situations and for the special needs of the judicial system.

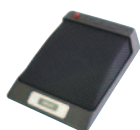

- Includes all features of steno-s 4 Conference
- Recording of meetings depending on the event
- Unlimited number of audio tracks from the software side
- Integration of session management solutions for the judicial system

Accessories

STA 44 Art.No. 484954

Foot switch to control the playback functions. Supplied with a 1.5 m [4.9 ft] long cable and USB connector.

MPC 70 USB Art.No. 475548

Acoustical boundary microphone to record meetings via PC. Supplied with a 3 m [9.8 ft] long cable and USB connector.

DT 3 Art.No. 484598

Neckworn microphone, 32 Ohms, cable length 1.6 m [5.3 ft], mini stereo jack
